

What is the Sprout Shell?

Sprout Shell is a three in one product that saves money and precious diaper bag space. With uses through toddler-hood it is a great value to families everywhere.

An Infant Carrier Cover--The Sprout Shell is the first general use infant carrier cover that is both stylish and functional. If you've been searching for a convenient, practical way to cover your infant while in its car seat-and know it's going to stay put - The Sprout Shell is it.

Sprout Shell Infant Carrier Covers fit over the carrier's handle to create a tent-like enclosure that protects infants from the elements and creates privacy. Sprout Shell is more practical than a blanket to cover an infant carrier because the hole in the top gives a secure grip on the handle and a view of the baby inside while blocking the wind, rain, dust, sun and nosy strangers. The elastic in the bottom secures the Sprout Shell to the carrier so it won't fall off or blow away. Because it stretches, it fits over virtually every infant carrier.

Use it anytime, anywhere, indoors and out:

On the go—restaurants, movies, grocery store, shopping centers

In the car to keep sun out of baby's eyes—un-attach the back half so baby has sufficient air

Whenever you want to keep baby covered and protected!

A Nursing Cover-- Place the hole over your head and around your shoulders. Bring baby under the cover and you're ready to go. The elastic prevents baby from kicking it off and mom is sure to stay covered too.

Shopping Cart Cover-- Keep baby from the germs of the shopping cart by using a Sprout Shell as a barrier. Baby will stay clean and mom can have peace of mind.

The **Sprout Shell** is available in a variety of fabrics, and all fabrics are easy to care for and machine washable.
